DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The prior art of record, either alone or in combination, fails to teach, suggest, or render obvious the combined limitations of each of the independent claims, especially in regard to the limitation of Claim 1 stating that: *"... said at least one document containing a plurality of images, a first of said images being a full image and the remainder of said plurality of images being a single file of thumbnail images, whereby when a user of said user display device selects a given thumbnail image from said remaining plurality of images, the central database forwards the full image corresponding to said given thumbnail image"*.

2. The closest prior art combination of Bobo II, in view of Rowe neither teaches nor suggests a document containing a first full image with the remainder of the plurality of images being a single file of thumbnail images. The prior art of record discloses combinations of full and thumbnail images, but typically thumbnails exist as separate files and/or a complete set of full images is typically contained within a single file. The advantage of the claimed invention is that it allows the user to first browse a single page of the document without first loading/downloading the entire file of full images thereby decreasing the latency involved with either downloading and/or loading especially a large multi-paged document to be viewed. The claimed file content is also smaller providing the benefit of saving storage space, especially on devices with smaller

storage capabilities.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
